

# First Grade Newsletter

We started a holiday card project. We made holiday cards and sent them to classes all over the U.S. and Canada. Each day we are so excited to receive a holiday card from other classes. In the card we learn how many boys & girls in each class and what the weather is like in their state. We have been graphing the data we have collected and putting our cards up on a U.S. map.

In math we are working on addition and subtraction to 20.

We started nutrition class with Chef Sarah and made a delicious apple crisp. First, we chopped up the apples. Then, we made the filling. Last, we baked it in the microwave. It was delicious! If you want to make it at home the recipe is in your child's Friday folder.

Looking to keep your child busy over the holiday break? There will be a math packet in their Friday folder on 12/22. Also, here is a link to a fun math challenge <http://gregtangmath.com/newyears>

Publishing Party  
December 22  
8:30-9:15

**Please note 12/22 is early dismissal at 12:30. There is after school.**
