

First Grade Newsletter

We observed the National Walkout on Wednesday by holding class meetings during snack time. We discussed how to be a good friend, how to recognize when someone needs a friend, and how to manage our own feelings. The students came up with great ideas for helping each other and getting help themselves. We are really proud of how seriously they took the discussions.

In Science we watched a movie about how rainbows are made. Then, we worked on our engineering skills.

Thank you to everyone who has scheduled their conference and those who we have already met with. We look forward to meeting with everyone. Please contact your teacher to schedule a conference if you have not done so already. Please be on time to your conference!
Thanks!

We used Opinion Writing to talk about what others thought was the best thing in our collection and politely disagreed with them.
